

POLICY ROLES AT INFRASTRUCTURE THINK TANK

About Infrastructure Partnerships Australia

Infrastructure Partnerships Australia is an independent think tank and peak industry body with members across the public and private sectors. Infrastructure Partnerships Australia was created to drive purposeful reform in infrastructure and efficient public services, with the aim of achieving the best possible economic and social success for Australia. We consider infrastructure issues spanning transport, utilities and social infrastructure (such as social housing, health, education and justice).

The Policy and Research team

The Policy and Research team develops industry-leading public policy and advice on the major issues, challenges and opportunities in the infrastructure sector. The team aims to advance the reform agenda and help shape the market for infrastructure investment in Australia. We also produce the Australia & New Zealand Infrastructure Pipeline (ANZIP), which provides the most comprehensive, trusted and insightful picture of future infrastructure investments in the region.

The roles

We are recruiting a number of roles within Infrastructure Partnerships Australia's Policy and Research team. The successful candidates will play a central role in identifying, developing and delivering high-quality advice on infrastructure policies and reforms in Australia and New Zealand, including the developing and leading research projects. These roles also provide unrivalled opportunities to develop and maintain effective relationships with senior business and public sector leaders across the infrastructure sector.

About you

The successful candidates will join a team of dedicated infrastructure policy professionals from a range of academic and professional backgrounds. Whatever your background, we expect you to be intellectually curious, personable and to understand that communicating and implementing ideas is just as important as coming up with them.

Preferred candidates will have:

- exceptional writing and editing skills, with the ability to develop a range of policy documents
- a strong intuition for problem solving, with highly developed research and analytical skills
- the capacity to undertake complex quantitative and qualitative research
- the ability to present and debate ideas persuasively
- a good understanding of the infrastructure sector and a desire to learn more
- a strong track record of successful projects or programs
- relevant tertiary qualifications (economics, public policy, law, commerce, engineering, etc) and a strong academic record
- the ability to manage competing priorities and projects, and deliver work to tight deadlines
- strong attention to detail
- an outcome-orientated approach to work, and
- a passion for delivering positive change through infrastructure.

Additional desired attributes include:

- experience in infrastructure or a public policy role within government, a regulator or the private sector
- an understanding of public policy development at different levels of government
- a demonstrated capacity to engage collaboratively with a range of stakeholders, including at senior executive levels, and
- a sound understanding of economic and financial principles.

Additional details

- Sydney CBD based position
- Flexible working policy
- Interstate travel and working outside normal hours will be required on occasion
- Attractive remuneration commensurate with experience
- Opportunities for career development

To apply

Applicants must send a covering letter and resumé to: IPACareers@infrastructure.org.au

For initial queries, please contact: Helen Cameron on 02 9152 6010.
